## Product Modification

### Design Changes EPIC<sup>®</sup> CIRCON M23 housing

The new design of EPIC<sup>®</sup> CIRCON M23 housing has compared to the previous version a smaller and closed marking ring. The transparent ring has been adjusted according to the colours of the counterpart and is now black. In addition, the coupling nut is longer and is now better integrated in the EMV protection system.

The new EPIC<sup>®</sup> CIRCON housing is expected to be launched in March 2010.

#### Benefits:

- better handling when locking
- better contact - better EMV protection
- The marking ring can not be lost and will be the same colour as the counterparts.

#### Current style:

#### New style
