EPIC® LS1 and M23 circular connectors with modified cable gland

The plastic inserts of the cable gland of the circular connectors EPIC® CIRCON LS1 and EPIC® CIRCON M23 are modified. The slots on the side of the plastic insert of the cable clamping are shortened. Affected types with integrated cable clamping are the housing types D6, F6 and F7.

EPIC® LS1 D6 EPIC® LS1 F6 EPIC® LS1 F7 EPIC® M23 D6 EPIC® M23 F6 EPIC® M23 F7

The advantages of the modified cable gland:

- Higher safety when strands of the braid stick out of plastic part
- Higher clamping effect (braid-pinch ring) with applied shielding

The part numbers of the affected connectors remain the same. This optimization will be integrated continuously into production. Due to the large variety of products and different range of stocks it is possible that mixed deliveries to customers may occur.
